Education

Dwarkadas J. Sanghvi College of Engineering — Mumbai, India
B.Tech in Electronics and Telecommunication, Honors in AI/ML (CGPA - 7.6) — *May 2023 – May 2027*

Experience

Sugamaya Governance LLP — June 2026 – Current
Fullstack Developer Intern — *Kandivali West, Mumbai | On-Site*

- Worked across web development, mobile development, and backend architecture on multiple concurrent client and in-house products, translating product requirements into shipped features end-to-end.
- Built and iterated on the company's in-house collaborative platforms, contributing UI enhancements, API integrations, and performance improvements to core workflows.
- Designed and maintained backend services and database schemas, ensuring reliable data flow between mobile, web, and server layers.
- Collaborated with cross-functional teams to debug production issues, optimize deployment pipelines, and improve overall system reliability.

Tech Mahindra — June 2025 – August 2025
IT Intern — *Powai, Mumbai | Hybrid*

- Engineered workflow in ServiceNow under ITIL4, eliminating manual intervention in enterprise ticketing systems.
- Streamlined incident management for enterprise clients, driving a 20% increase in SLA compliance, and performed root-cause analysis to optimize processes and enhance operational efficiency.

Projects

NeuroHaven | *React, TypeScript, TailwindCSS, Firebase, Gemini API* | Live

- Developed an AI-driven mental wellness platform for students with real-time mood analysis and conversation.
- Integrated LLM-based APIs to enable context-aware and adaptive user interactions.
- Designed a modular API architecture with structured state management and secure data handling using Firebase.
- Built dynamic emotional heatmaps for behavioral data visualization, enabling deeper user insights.

Flagzilla | *Next.js, TypeScript, Three.js, React Three Fiber, WebSockets* | Live

- Built a browser-based real-time 3D multiplayer game with smooth rendering and interactive gameplay.
- Implemented WebSocket-based player synchronization with authoritative backend state management.
- Designed a real-time in-game chat system using WebSockets, enabling communication during live sessions.
- Developed robust state management strategies for handling player states, game events, session lifecycle, authentication, matchmaking, and leaderboard updates.

YapMonster | *React, TailwindCSS, Chakra UI, Node.js, Express.js, MongoDB, Socket.IO* | Live

- Built a full-stack real-time chat application supporting scalable group communication.
- Implemented WebSocket connections with JWT authentication and room-based event broadcasting.
- Developed backend APIs using Express.js and MongoDB for user management, messaging, and chat persistence.
- Deployed frontend and backend on Vercel and Render to ensure high availability and reliable global access.

Leadership

Editorial Head, DJSCE IETE-SF (Aug 2025 – Present): Launched the department's flagship newsletter and core-organized Unplugged 3.0, a 24-hour national level hardware hackathon for 300+ participants.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C/C++, HTML, CSS, DSA

Frameworks: Next.js, React, React Native, Node.js, Express.js, Socket.IO, WebSockets

AI/ML: Machine Learning, NLP, Text Embeddings, TF-IDF, Cosine Similarity, Information Retrieval, Feature Engineering, Model Evaluation, Data Preprocessing, Pandas, NumPy, Scikit-learn, LLM APIs, Elysia, Drizzle

Developer Tools: Git, GitHub, VS Code, Firebase, Supabase, Postman, DBeaver, Bun, Docker

Databases & Infra: MongoDB, MySQL, PostgreSQL, SQLite, Prisma, Redis, Cloudflare R2

UI Libraries: Chakra UI, Material UI, TailwindCSS, Three.js, Framer Motion
