Education

Dwarkadas J. Sanghvi College of Engineering — Mumbai, India
B.Tech in Electronics and Telecommunication, Honors in AI/ML (CGPA - 7.6) — *May 2023 – May 2027*

Experience

Sugamaya Governance LLP — June 2026 – Current
Fullstack Developer Intern — *Malad West, Mumbai | On-Site*

- Developed and maintained full-stack web applications using Next.js, React, TypeScript, Node.js, and PostgreSQL, contributing across both frontend and backend systems.
- Designed and implemented backend architecture including REST APIs, database schemas, Prisma ORM, authentication, and notification worker/queue systems.
- Worked extensively with Neon and Supabase, including database migrations, schema management, and production debugging across different environments.
- Integrated and worked with services including Redis/Upstash, Appwrite, Cloudflare R2, Better Auth, Razorpay, Calendly, and external APIs for authentication, payments, storage, scheduling, and platform functionality.
- Performed API testing, end-to-end website testing, iOS/Android testing, deployment/debugging on Vercel and Render, Git/GitHub-based development, and contributed to shipping production-ready features.

Tech Mahindra — June 2025 – August 2025
IT Intern — *Powai, Mumbai | Hybrid*

- Engineered workflow in ServiceNow under ITIL4, eliminating manual intervention in enterprise ticketing systems.
- Streamlined incident management for enterprise clients, driving a 20% increase in SLA compliance, and performed root-cause analysis to optimize processes and enhance operational efficiency.

Projects

TruePath | *Nextjs, TypeScript, BullMQ, Redis, Appwrite, Prisma, PostgreSQL* | Live

- Architected an Event-Sourced Financial Ledger & CQRS personal finance application, decoupling write commands from read models to maintain an immutable, audit-ready financial domain stream.
- Engineered Resilient Asynchronous Processing & Self-Healing Sync, implemented a BullMQ & Redis queue pipeline for background projection processing with a synchronous fallback mechanism.
- Built robust user authentication via Better Auth (OAuth 2.0 & Email/Password), request idempotency protection against duplicate transactions, and server-proxied receipt file uploads with strict ACL permissions using Appwrite.

Tranceformission | *Next.js, TypeScript, Neon, Appwrite, Better Auth, Resend, Calendly, Google Oauth* | Live

- Architected Tranceformission Platform Ecosystem, comprising 3 dedicated applications (Coach Portal, Learner Discovery, and Admin Console).
- Developed Raw SQL Data Layer & Database Migrations using @neondatabase/serverless connection pools, dynamic SQL views (coach and learner), and transactional query executions without an ORM overhead.
- Built End-to-End Coach Onboarding & Moderation Pipelines. Created multi-stage approval workflows, phone OTP verification, and admin controls for booking management.

Leadership

Editorial Head, DJSCE IETE-SF (Aug 2025 – Aug 2026): Launched the department's flagship newsletter and core-organized Unplugged 3.0, a 24-hour national level hardware hackathon for 300+ participants.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C/C++, HTML, CSS, SQL
Frameworks & Libraries: Next.js, React, React Native, Node.js, Express.js, FastAPI, Socket.IO, Three.js, R3F
Databases & ORM: PostgreSQL, MongoDB, MySQL, SQLite, Prisma, Drizzle ORM, Neon, Supabase
Cloud, Storage & Infrastructure: AWS, Firebase, Vercel, Render, Docker, Redis, Upstash, R2, Appwrite
Developer Tools: Github, Bun, DBeaver, Linux, Razorpay, Calendly, Resend, Google OAuth, Postman, Better Auth
UI & Animation: Tailwind CSS, Chakra UI, Material UI, Framer Motion, ShadCN, Watermelon UI
